SUMMARY

BSIT Graduate with hands-on experience building mobile and full-stack applications, integrating machine learning models, and designing optimized database architectures. Proven ability to deliver production-ready systems from concept to deployment through impactful internship roles and end-to-end project execution.

EXPERIENCE

IT Intern | Liberty Investigation and Security Agency Inc.

Jan 2026 - April 2026

- Architected and executed the migration of the core company database from MS Access to MySQL, resulting in a 200% increase in system performance and data retrieval speeds.
- Modernized network infrastructure by diagnosing connectivity issues and overhauling physical cabling to improve office-wide uptime and signal integrity.
- Provisioned and maintained corporate hardware, including high-level troubleshooting of workstations and the installation of critical hardware components.

Freelancing

2023 - Present

- Delivered paid project-based work for multiple clients, managing scope, deadlines, and deliverables.
- Developed games, web systems, mobile applications, and multimedia content based on client requirements, handling core functionality, basic UI, and feature implementation.

App Development Volunteer | School Student Council

2025

- Contributed to the development of a mobile attendance application used during the school's intramurals event to automate attendance and participation tracking.

Multimedia Volunteer - Video Editor | School Student Council

2025

- Edited and produced official intramurals event videos, ensuring clean cuts, pacing, transitions, and appropriate music selection.

PROJECTS

MoneySense - Philippine Peso Identifier Application

- Developed a voice-guided mobile application for visually impaired Filipinos to identify and verify Philippine coins and bills.
- Implemented real-time denomination detection using YOLOv8, bill verification using ResNet-18, and accessibility features built using Flutter.

ALAMS - Automated Logbook Attendance Monitoring System

- Developed a kiosk-style mobile attendance application featuring multi-layer biometric security through on-device face recognition (FaceNet TFLite), active liveness detection (randomised challenges via Google ML Kit), and passive neural anti-spoofing (MiniFASNet via NCNN/JNI).
- Implemented offline-first architecture using SQLite with real-time Supabase cloud sync, PBKDF2-hashed admin authentication with brute-force lockout, and an admin dashboard with live attendance metrics and configurable workforce settings.

Hand2Voice - Filipino Sign Language Translator

- Created a mobile application that translates filipino sign language from deaf to non-deaf users using Flutter and Tensorflow's LSTM model trained with the FSL-105 dataset.
- Implemented a two-way processing of the sign languages by offline and online to ensure usability and performance as well.

TrackWise - Expense & Budget Tracker

- Created a personal finance web application to track expenses, manage budgets, and visualize financial data.
- Implemented transaction and account management, budget planning, financial reports, and theme switching using Laravel, Livewire, and Supabase's PostgreSQL.

BIS - Barangay Information System

- Designed and built a full-stack information system for Barangay 73 Caloocan to reduce manual processing errors and improve queueing efficiency.
- Implemented resident, officer, and account management, certificate request and printing, and announcement delivery via email and SMS using Laravel, Bootstrap, and MySQL.

EDUCATION

Bachelor of Science in Information Technology
Systems Plus Computer College (Caloocan)

2022 - 2026

Information and Communications Technology
Caloocan High School

2020 - 2022

SKILLS

- **Technical Skills:** Programming, Video Editing, Microsoft Excel & Word, Computer Troubleshooting (Hardware & Software), OS Installation and Configuration, Computer Hardware Setup & Maintenance
- **Programming Languages:** PHP, HTML, CSS, MySQL, PostgreSQL, C#, Python, Dart
- **Frameworks:** Laravel, AlpineJS, Livewire, TailwindCSS, CodeIgniter, Bootstrap, Flutter
- **Tools Used:** Git, GitHub, Figma, Jira, Vercel, Supabase, Linux, Unity
- **Soft Skills:** Problem-solving, Team-oriented, Detail-oriented, Critical Thinking

CERTIFICATIONS

- **Microsoft Excel 2019 Specialist** - Microsoft (2022)
- **Introduction to Data Science** - Cisco NetAcad (2025)
- **Computer System Servicing NCII** - TESDA (2026)
